EXPERIENCE

Data Science Intern

Dec. 2025 - Current

Kelp Global

- Integrated LLM APIs (Gemini, OpenAI, Perplexity) with grounding for business use cases and debugged incorrect outputs in existing pipelines.
- Improved retrieval quality (recall & precision) in the core product by applying advanced prompting techniques, directly enhancing search relevance.
- Conducted POC on embedding models for domain-specific business use cases and benchmarked performance across candidates.
- Analyzed open-source LLMs and built multi-modal RAG pipelines handling text, image, and table data for enterprise document understanding.

PROJECTS

SeatAlgo – MHT CET College Counsellor | *Python, Pandas, NumPy, Streamlit, Web Scraping*

- Developed a web app to predict MHT-CET seat allotment using 3 years of data and Pandas filtering.
- Processed **100,000+ records** across institutes and courses; implemented web scraping from official CET PDFs.
- Deployed with **Streamlit** for real-time accessibility and created reports and dashboards of the data.

Doc & Brain – Hybrid RAG Agent | *Python, LangChain, Gemini API, Qdrant, SQLite, Streamlit*

- Engineered a **Hybrid RAG system** routing queries between a Vector DB (Qdrant) for semantic search and SQL for precise analytics.
- Built an **automated ingestion pipeline** using LangChain and Pydantic to extract structured entities (prices, dates) from unstructured PDFs.
- Deployed an **Agentic Workflow** distinguishing qualitative vs. quantitative queries, **eliminating LLM hallucinations on math tasks**.

FinPlan – Smart Investment Portfolio with ML | *Python, Scikit-learn, PyTorch, NumPy, Pandas*

- Led the ML module for smart investment recommendations; built a semi-synthetic dataset of **10,000 realistic records**.
- Built a **multi-output regression model** with **MSE of 1.5%** to recommend allocations across Gold, Stocks, Equity, and Retirement Funds.
- Integrated models into a platform that recommends optimal investment actions based on **net worth, goals, and risk appetite**.

EDUCATION

Dr. D. Y. Patil Institute of Technology, Pimpri, Pune

Nov. 2022 - May 2026

Bachelor of Engineering in Artificial Intelligence and Data Science

CGPA: 9.61

VOLUNTEERING EXPERIENCE

Technical Associate

Feb 2025 - July 2025

Data Science and AI Inquisitive (DSAII)

- Curated technical MCQs for TechStake at Technovation 3.0.

Secretary

Nov 2023 - Nov 2024

Society for Data Science (S4DS)

- Organized Vortexa Hackathon; handled complete event planning and coordination.

TECHNICAL SKILLS

Languages: Python, C++, SQL (MySQL), MongoDB

Fundamentals: OOP, DSA, DBMS, OS, CN, NLP, Maths & Stats

Libraries/Tools: Pandas, NumPy, Matplotlib, Scikit-learn, PyTorch, LangChain, VectorDB, FastAPI, Excel, Power BI

CERTIFICATIONS / ACHIEVEMENTS

- Certified in Python by University of Michigan (Coursera)
- Completed Machine Learning Specialization from Stanford Online (Coursera)
- Certified in Google Cloud via GDSC Cloud Jam
- Solved 300+ problems on LeetCode using Python and SQL
